WILMINGTON, N. C.,

SATURDAY, SEPTEMBER 3, 1970. Chief Justice Pearson.

One of the most painful of our duties as a public journalist, has been the necessity that from time to time has been laid upon us to speak in condemnation of the con duct of the members of the judiciary of The judicial ermine is of such sensitive purity, such exceeding whiteness, that it can be affected by even the slightest touch. Appreciating the consequent importance of circumspection of speech and act in regard to the Law and its Judges, we are always slow to criticise them. There are times, however, when it becomes necessary to talk plainly, and such, we think, is the present time.

Chief Justice Pearson has, by his course during the recent Habeas Corpus proceedings, destroyed a reputation for judicial probity that he had enjoyed since his accession to the bench. It is painful to see one who has enjoyed the confidence and respect of a whole people in his old age so carried away by eagerness for office or partizan feeling, as to destroy in a few short weeks the honorable fruits of an honored life time.

Well might the Chief Justice utterpious ejaculations of thankfulness that his lines had fallen among the pleasant places of Richmond Hill, rather than in the foul air and filth and lice and excrement of Kirk's

As strange as it may seem, these are nevertheless the facts. ### Who Garbled the Letter ?

Senator Abbott has written a letter to the New York Tribune, sending that paper a copy of the original letter written by Judge Tourgee to him. Abbott says he read the letter in his room in Washington City to Senator Pool, Gov. Holden and others, and Holden requested a copy. It was copied from the original by his private clerk. Abbott had no idea that it was to be printed.

From the remarks of the Editor of the Tribune it appears that Judge Tourgee was "mistaken" in "thinking" he wrote four arsons, instead of fourteen, (how delicately Greeley puts it,) and that he is right in

# The War in Europe\_The Last News,

It is frequently said that truth is stranger than fiction. If any one were inclined to doubt the truth of this aphorism, the history of the two Napoleons would convince the most incredulous. In every war that belligerent who introduces a new improvement, must have the advantage in the first campaign at least. In 1866 Prussia vanquished Austris by the employment of the needle gun. as much perhaps as by any other cause. In 1870 she prostrated France by hurling against her an unparalleled and overwhelming force. The second cause is the evident want of preparation of France and the gross incapacity and supineness of her administration. It is no excuse for the Government to say that they were not aware of the gigantic preparations of Prussia. If they did not know they ought to have known. If Prussia could send her emissaries to study out the condition of France, why could not France do the same? If her system of reserves was inferior to the Prussians, why did not the Government establish a better one? The Emperor's Government can never wipe away the of Vic. Barringer's place on the Commis-

Such things had never hitherto been known in North Carolina. And his brother lawyers have always said of him that his opinions were influenced by his personal interests, and that his decisions were affected by his prejudices and partialities, especially by case. Such things never have been said, and never will be said of a pure and up right Judge. I remember well that the fall from Ruffin to Pearson was thought to be a terrible fall for North Carolina; and such it has proved to be.

The fact is, Messrs. Editors, those who know Judge Pearson have not been so much astonished at the qualities of the heart which he has recently displayed. They have only wondered that his head should have been so much at fault; and dents from abroad, and as many day they feel that he must be closely watched he will pave the way for evil times in
